

GM Report
PVH Subdistrict
June 17, 2020

Information only

- We received a complaint from a resident of Chatfield Estates concerning erosion because of annual flushing in the area. It is always a challenge to flush in areas without drainage facilities, and the soil in Chatfield Estates is highly erodible. We responded by filling in the eroded area and adding seed. The resident submitted detailed suggestions on how we can improve our flushing procedure, but many of his suggestions would require extensive traffic control, Douglas County permits to close lanes, and increase District costs. We will review his recommendations and implement as we are able and take other steps to avoid his property in the future.

Inclusions:

- No recent requests
