

**GM Report
PVH Subdistrict
June 19, 2019**

Information only

- We have had a good response to our last letter reminding residents that they have until August 1, 2019 to connect; approximately 36 properties left to connect.
- We are not allowing residents to pay the System Development Charge but not connect because that will result in prepaid taps the District will have to track, and it is not consistent with the District's Rules and Regulations.
- We have agreed to provide residents with a grace period to make their physical connections if they have (a) paid their System Development Charge; and (b) entered into a contract to construct the connection. Many of the companies that routinely do the service line construction in the area are backed up several weeks and can't get the work done by August 1.
