

General Manager's Report June 19, 2019

Information only

Administrative Items:

- The District has entered into a new Professional Services Agreement with Browns Hill Engineering and Controls to provide managed IT services for both the administrative offices and operations, and has given the former consultant notice we will not be renewing their agreement. Browns Hills did all of the automation programming at the water treatment plant and is better equipped to manage those systems along with providing administrative support.
- The District received a claim for damages to landscaping and other expenses from Mr. Brad Lindseth and Ms. May Britt Bjerke at 5248 Black Squirrel Run related to the District's flushing on April 1. We have responded that any damage was the result of debris and vegetation overgrowth in the Roxborough Park Foundation's drainage ditches and culverts, and not the District's flushing.

Information only

Dominion/Sterling Ranch:

- Overall operations going well.
- Still discussing potential 3-5 year extension of O-Line Agreement to provide wastewater service.
- Construction of the Willow Creek Lift Station and Filing 3 site preparation has commenced.
- Developing an emergency response plan to clarify responsibilities between Dominion and the District.

Information only

Inclusions:

- No current requests for inclusion.

Information only

Ravenna:

- Phase 2 Water Connection mostly complete; addressing complaints related to reduced water pressure.
- Owners of 7887 Cicero Court will be allowed to keep their retaining wall if the building funds a structure liner for the sanitary sewer and a License Agreement protecting the District.

Information only

Raw Water Irrigation:

- Preliminary design and updated costs to rebuild Lambert Reservoir dam progressing.
- Developed three alternatives to comply with the District's agreement with Aurora to remove our facilities from Rampart Reservoir that we will be discussing with the City.

Information only

Public Outreach:

- Posted blogs on impacts of summer irrigation to water pressure; Lead, PFOA and PFOS in drinking water (we do not have any); and thank you to residents that sample for Lead to comply with regulations.
- Open House June 8 – will report on the event at the Board meeting.
- I have been named to the Economic Considerations/Local Government Perspective Work Group on demand management as part of the Colorado River Drought Contingency Plan.
- On May 9, I was re-elected as Chairperson of the Colorado Water Conservation Board's Metro Roundtable.
